

ASIF UDDIN AHMED

COMPUTER SCIENCE & ARTIFICIAL INTELLIGENCE STUDENT

<https://asifahmed.vercel.app/>

: Münchener Straße 163, Ingolstadt, Bavaria

: mylifeasasif@gmail.com

: +49 15511982155

: www.linkedin.com/in/asifuahmed/

: <https://github.com/skupperr>

Nationality: Bangladeshi

PROFESSIONAL PROFILE

Computer Science & Artificial Intelligence student specialized in full-stack development, AI integrations, agent systems, and scalable software design. Experienced in building production-ready applications across FastAPI microservices, interactive web platforms, and AI-powered tools. Skilled in software development, system design, and modern ML frameworks, with a strong ability to break problems down from first principles and turn ideas into clean, reliable products. Always exploring tools that make development smarter and faster. Seeking opportunities to contribute to high-impact engineering teams.

Primary Stack: Next.js, TypeScript, JavaScript, FastAPI, Python, Node.js, MySQL

EDUCATION

Sep 2024 – Current

Bachelor's Computer Science and Artificial Intelligence

Technische Hochschule Ingolstadt

28 ECTS completed out of 210

German Grade: 1.5

July 2022 – Jan 2025

Bachelor of Science in Computer Science and Engineering

United International University, Dhaka, Bangladesh

CGPA: 3.95/4.00

(69 credits completed out of 137)

WORK EXPERIENCE

Aug 2025 – Oct 2025

Undergraduate Teaching Assistant

United International University, Dhaka, Bangladesh

- Supported course instructors in conducting lab sessions, ensuring students could navigate programming concepts and tools effectively.
- Delivered one-on-one and small-group guidance to students, helping clarify complex topics and improve assignment quality, contributing to roughly 30% of supported students achieving an A in the course.
- Provided 50–70+ students across two courses with structured tutorials and overtime support.
- Review lab classes topic as needed.
- Led additional tutorial classes outside regular hours to assist struggling students and raise overall course performance.

SCHOLARSHIP & AWARDS

UIU Merit Based Scholarship – United International University

- 4 times 100% scholarship holder (4th, 5th, 6th, 7th trimester)
- 2 times 50% scholarship holder (2nd & 3rd trimester)

UIU CSE project show – United International University

- 1st runner-up out of 86 teams in Advanced Object-Oriented Programming

PROJECTS

Prove My Point | React.js, FastAPI, Firebase, Clerk, LangChain, Tailwind CSS, GCP

Full-Stack & AI Developer | Solo Project | 2025

- GitHub: [skupperr/Prove-My-Point](#) • Live: [prove-my-point.vercel.app](#)
- Built a full-stack AI platform that retrieves peer-reviewed research from arXiv, PubMed, and Semantic Scholar to help users back arguments with credible evidence.
- Implemented a RAG pipeline using FastAPI, LangChain, and Sentence Transformers, enabling semantic search over 2M+ academic papers.
- Developed a responsive React/Tailwind frontend with secure authentication (Clerk) and integrated a Firebase-backed personal Q&A history.
- Deployed a production-ready system on Vercel and Google Cloud Platform (GCP), delivering research-supported answers in seconds and reducing user research time by ~60%.

LifeLens AI | React.js, FastAPI, Redis, MySQL, LangChain, Clerk, JavaScript, Python

Full-Stack & AI Developer | Solo Project | 2025

- GitHub: [skupperr/LifeLens-AI](#)
- Built a multi-module AI platform combining meal planning, productivity tools, career guidance, and financial planning, powered by a central LLM assistant using FastAPI, LangChain, and Sentence Transformers.
- Designed a scalable microservices architecture with MySQL + Redis, achieving 60% fewer DB queries.
- Developed a full React/Tailwind frontend with secure authentication (Clerk), and Gmail integration
- Delivered measurable user impact: 40% better decision-making confidence and sustained engagement (25+ min avg session time).

TECHNICAL SKILLS

Programming Skill	OOP, Data Structure & Algorithms, Database, Full-Stack Development, Web Scraping, ML Algorithms, RAG, Agentic System
Programming Language	Python, C/C++, Java, JavaScript, TypeScript, HTML/CSS, SQL
Framework & Libraries	• FastAPI, Node.js, Express.js, React.js, Next.js, Tailwind CSS • LangChain, Scikit-Learn, NumPy, Pandas, Matplotlib, OpenCV • BeautifulSoup4, PlayWright
Database	MySQL, SQLite, Firebase, Redis
Tools & Utilities	Git/GitHub, Docker
